Банята е мястото, в което започва и свършва денят на всеки от нас.

Нейната роля, като място за почивка на тялото и сетивата, са ключови за нашето добро здраве и самочувствие.

Фаянсовите плочки са покрити с глазурен слой, който запечатва повърхността им и ги прави водоустойчиви и лесни за почистване и поддръжка. С помощта на водещите технологии в керамичната индустрия, като дигитален печат, водно и диамантено рязане, тройно изпичане с платина или ветроза, всяка баня е уникална и неповторима. Тя изразява индивидуалния стил и характер на всеки потребител.

Ние залагаме на разнообразието във всички размери, цвят, дизайн, повърхности и декоративни елементи, за да дадем възможност на всеки да остави своя почерк в банята и да се наслади на релаксиращите моменти в нея.

The bathroom is the place where the day begins and ends.

It is a place for relaxation of the body and the senses, which are important for our physical health and self confidence.

Due to their glazed finished surface, the ceramic tiles are waterproof, easy to maintain and clean.

Utilizing and implementing leading technologies like digital printing, water jet and diamond cutting, triple firing with platinum and vetrose, you get to enjoy products, which are designed to make the bathroom distinctive and unique its nature.

Indeed, the greatest characteristic of ceramic tiles is their exceptional ability to express every individual style and personal character.

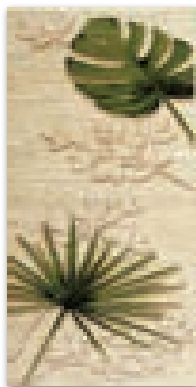

We emphasize on variety in all sizes, colors, designs, surfaces and decorative elements only to make it possible for everyone to leave their individual signature on their bathroom interior and thoroughly enjoy relaxing in it.

A photograph of a forest floor. In the foreground, there are large, rounded rocks covered in vibrant green moss. A fallen, weathered log lies horizontally across the middle ground. The background is filled with the dense, green foliage of trees, creating a soft, dappled light effect.

Изработени от загрята, рафинирана глина, изпечени при температури от над 1200° C, гранитогресните плочки са все по-популярна алтернатива на традиционните настилки от естествен камък и дърво.

Те са твърди, устойчиви на надраскване и петна, издържат на тежък пешеходен трафик, като този в жилищните и търговски обекти, което ги прави чудесен избор, както за вътрешна, така и за външна употреба.

Гранитогресът е универсална, широкоприложима настилка, с голямо разнообразие от цветове, дизайни, форми и размери, която се интегрира лесно във вашата всекидневна, спалня, кухня, коридор, градина или офис.

Дървесни дизайни, циментови повърхности, естествени камъни като мрамор, травертин или гранит - всичко, което можете да намерите в природата присъства и в нашия асортимент. Нека му се насладим.

Made from heated, refined clay, fired at higher than 1000° C temperature, porcelain tiles offer an increasingly popular alternative to natural stone and ceramic tiles.

Porcelain tiles are tougher, more resistant to scratch and stains and have greater density. In addition, they can easily endure in heavy foot traffic at residential and commercial locations, which makes them great option for both indoor and outdoor use.

We consider this type of tile flooring is intensely versatile in its floor and wall application and we have made a great variety of colors, textures, shapes and sizes, that will integrate easily into your living room, bedroom, kitchen, hallway or office. Wooden designs, cement looks, natural stones like marble, travertine and granite- all that you can find in nature, is also present in our assortment.
